

Light Duty Automotive Testing Services

Cummins Filtration believes in the close relationship between product testing and product quality. That is why we offer the most comprehensive testing services in the filtration industry:

Filter Evaluation

- Dust capacity
- Efficiency
- Pressure drop
- Media migration
- Filter cleanliness
- Fuel resistance
- Thermal resistance
- Vibration resistance
- Fuel pump/delivery module filtration
- Tensile strength
- Air ingestion
- Collapse/burst resistance
- Fatigue/cycling resistance
- Water separation

Filtration Media Evaluation

- Wicking
- Bubble point
- Largest passing particle
- Air permeability
- Porosity
- Efficiency
- Dust capacity

All testing is performed in our state-of-the-art laboratory by technicians who specialize in developing custom test plans that meet your program objectives. We test to your standards or applicable industry or international standards! To ensure test results remain proprietary, results are always maintained in the strictest confidence.

Cummins Filtration is TS 16949 and ISO 9001 certified and supplies many of today's leading OEM and Aftermarket manufacturers. Our comprehensive capabilities in engineering, media development and design validation uniquely qualify us to serve you during all stages of filtration program development.

Cummins Filtration is ready to apply professional testing capabilities to your filtration projects. For a complete solution to your most exacting testing needs, contact us today!
