

RC-PTCU.HV

Portable Tank Cleaning Unit
High Volume Transfer Filtration

The Permanent
Filtration Solution

HIGH VOLUME FUEL TRANSFER-FILTRATION UNIT

The RC-PTCU.HV is a 60-gallon a minute portable contaminate removal system, designed specifically for the cleaning and transferring of fuel to and from above and below ground fuel tanks.

Utilizing the Blade Master self adjusting, self priming pump, with the proven RCI Technologies Purification unit to provide not only an efficient fuel transfer system, but also an efficient fuel cleaning unit to remove the water and other contaminants from all your fuel stores.

* GPM/LPM ratings are based on tests under ideal conditions. Filter, automatic nozzles, longer hoses, etc. may reduce flow rate.

SPECIFICATIONS

- FP 1500-S Universal Fuel Purifier
- 1.5 H.P. Portable Explosion Proof Pump
- 110 Volt – Explosion Proof UL Listed Motor-Single Phase
- 10 Foot Inlet/Outlet Explosion Proof 1.5” Hose
- 4 Foot Aluminum Suction Tube
- AC Motor 1.5 Explosion Proof - 60 Hz.
- Quick Release Aluminum Cam Lock Couplings
- 90 Degree Swivel Couplings
- Durable 2 Wheel Dolly
- 1.5” Manual Shut-Off Nozzle

* Specifications subject to change without notice.
